

CONCESSIONS AT ORIOLE PARK

~~“Who is going to do concessions?” and “Where will concession profits go?” have been continuing questions since we began the construction of Oriole Park. Since the beginning, we have maintained two constants in thinking: The FFA will continue to operate football concessions; Additional concessions as a result of building the park should be returned to the park through the Oriole Park Maintenance Fund.~~

~~The District will enter into an agreement with two organizations to manage our concessions. One group will be selected to manage each season; fall and spring. The District will expect each selected organization to operate a concession stands at a minimum, at every varsity event throughout their respective seasons. The designated organizations may allow another club or group to conduct the concession stand during the season. Current examples are the Music Parents operating concessions for lower level football games and the Relay For Life group operating concessions for basketball. The District would expect each organization to be accommodating to any group providing a concession stand to a lower level activity during the season.~~

~~During the regular season, the respective groups will keep all profits. Profits from conference and WIAA playoff events will be split evenly between the group operating the concession stand and the District. The District’s half of the profit will be donated directly to the Oriole Park Maintenance Fund.~~

~~This rule will become effective on January 1, 2017. The FFA and Music Parents Association will operate concessions during the 2016-17 and 2017-18 school years. The District will reserve the option to open the agreements to other clubs if so desired but will do so prior to December 31 of the year prior to operation. Without prior notice, on January 1 of any given year, the organizations above may assume continuing agreements.~~

This administrative rule establishes consistent procedures for the operation, management, and financial handling of concession stands at Oriole Park. The rule ensures fairness, clarity of responsibility, and alignment with district goals, including support of the Oriole Park Maintenance Fund.

The District will approve one organization to be the operating organization to manage all concessions during a particular time of year or season. The operating organization will collaborate with other school-affiliated organizations that may request to operate concessions for non-varsity events.

The operating organization is responsible for operating concessions at a minimum of every varsity event held on the turf/track surface at Oriole Park. The operating organization will ensure operations comply with district health, safety, and food-handling guidelines as well as maintain adequate staffing, inventory, and financial accounting for all concessions.

Fall Season - The operating organization during the fall season will be identified as the Stanley-Boyd Chapter of FFA

All Other Seasons - The operating organization during all other times of year will be the Stanley-Boyd Athletic Association.

Lower-Level Events - All approved Junior Varsity and below, scrimmages, tournaments, or other district-approved events will be managed by the named operating organization above.

Financial Procedures The operating organization will retain 100% of profits from regular-season varsity events. Any conference championship games and WIAA Playoff Events will be divided between the operating organization and the Oriole Park Maintenance Fund. The District will receive \$200 for each event of this type. At the time of deposit, the District's share (\$200) shall be deposited directly into the Oriole Park Maintenance Fund, and the remainder will be deposited into the account of the operating organization.

The District reserves the right to modify or discontinue agreements based on organizational performance, compliance, or program needs.
