		Fax	715-644-5584

Furnish and install a 15 kW roof mount ballasted PV solar system
Provide appropriately sized inverter(s)
Provide required disconnects for the system
Lightning protection for equipment
Install all necessary mounting components, galvanized poles, concrete, trenching, racking and connections
Install all necessary conduit, wire, and miscellaneous parts for a complete system
Facilitate paperwork needed for permitting and utility interconnection agreements
Travel and labor expenses included for a complete installation
Unit to be connected at the Elementary Electrical Service Panel
Include any and all engineering, permits and state approved plans
Restore the grounds to its original condition (replace sidewalk if cut; reseed grass if disturbed etc.)
EGauge monitoring system connected to HS Foyer
Additional conduit installed to accommodate camera/tv cable
If after September 1, work must be conducted after 3:30 pm or on Saturday and/or Sunday
Provide an estimate of annual energy production

Response needed by 3:30 pm Friday, July 19, 2013
